METTLER TOLEDO

Fit for Purpose Solutions
Wrapping Equipment for Any Volume

No two backrooms are alike. Whether you're processing more than a thousand packages per hour or a few dozen per day, METTLER TOLEDO's weigh, wrap and label solutions give grocery retailers the flexibility to address any volume needs. From fully automated to manually operated – and everywhere in between – you select the equipment configuration that ensures maximum profitability, and provides critical backup throughout the business cycle.

Fastest Throughput

The 880 Auto Wrapper is the state-of-the-art, user-friendly fully automatic wrapping machine that large volume retailers can rely on. Built to withstand the heavy demands of the busiest backroom, the 880's ergonomic advantages – combined with its small footprint and intuitive controls – make it the perfect partner for high volume operations.

Automatic

Model	880 Auto-Wrapper	750 Semi-Automatic Wrapper	Step-Saver Manual Hand Wrapping Station
	Fully Automatic	Semi-Automatic	Manual
Wrapping	Automatic	Manual	Manual
Labeling	Automatic	Automatic	Manual
Speed	35 packs/min	22 packs/min	10 packs/min

Enhanced Labeling

The 750 Semi-Automatic Wrapper offers retailers the best of both worlds when it comes to backroom meat package throughput. Its automated weighing and label application allows for optimal package consistency and appealing display. When the capabilities of a fully automated machine are not required, the 750 is a smart, solid alternative.

Flexibility

Developed with smaller retail sites in mind, the METTLER TOLEDO Step-Saver Hand Wrapping Station provides a perfect secondary system for any back-room operation – even the largest and busiest ones. The flexibility offered by the Step-Saver also enables retailers to wrap oversized items.

Semi-Automatic

Manual

Designed for Demand
Complementary Wrapping Systems

By configuring its own unique combination of METTLER TOLEDO wrappers, any backroom meat department can maximize efficiency, enhance productivity and accelerate profitability.

Accelerate Profitability

880 Auto Wrapper
Built to withstand high customer demand, this fully automatic system produces the perfect wrap every time. Because speed and efficiency are paramount, the 880's intuitive design and software interface minimizes the time requirement for production changes, film roll replacement, and tray loading/unloading.

Weigh and Label Operations

750 Semi-Automatic Wrapper
The 750 is built to perform day in and day out, while providing uniform automatic label application for meat case displays. With its next generation technology and design, the 750 is poised to increase efficiency and boost quality for increased sales.

Enhance Flexibility

Step-Saver Hand Wrapping Station
Economical and easy to use, the Step-Saver does just what its name implies – it saves steps (along with space, time and money). A perfect complement to any backroom, the Step-Saver outfitted with a manual label printer is always ready to assist with backroom wrapping operations.

Customized Solutions for Every Grocery Retailer

- Wrapping of meats cut in-house
- Processing prepackaged items by weight
- Rewrapping of pre-cut beef
- Rewrapping of chicken and pork
- Fish packaging
- Fresh produce packaging
- All tray sizes
- Oversized items up to 60 pounds

Optimize Throughput

Perhaps your standard backroom wrapping requirement calls for 30 packs-per-minute, but occasionally ramps up to 40 per-minute or more. By combining an 880 Auto Wrapper or a 750 Semi-Automatic Wrapper with a Step-Saver Hand Wrapping Station, you can address peak customer demands with ease. Select a pairing of wrapping equipment products for all throughput needs.

Increase Productivity
Fast, Smart and Incredibly Easy to Use

In fast-paced backrooms, retailers don't want to sacrifice efficiency for ease of production. With the 880 Auto Wrapper, they don't have to. Built into its high-tech functionality is an ergonomic, user-friendly operating system that shaves seconds (and cents) off every step of the process, reducing the total cost of ownership.

Easy Film Changes

Quick film changes are critical for keeping up with customer demand, especially during peak times. The film chamber is conveniently accessible from the front of machine. Two different sizes of film are stored within the chamber, eliminating consumable waste.

Small Footprint

With a total footprint of only 20 ft^2, the 880 Auto Wrapper has one of the smallest footprints of any fully automated wrapper on the market. In a busy backroom, the 880's space-saving advantage means more room for product and personnel.

Interactive User Interface

With its large touchscreen display, the user interface guides operators step-by-step. On-screen instructions ensure the equipment is operated safely and correctly. Trouble-shooting prompts allow for quick and easy film and label roll changes.

Fast Production

With its ability to weigh, wrap and label items with speeds up to 35 packs-per-minute, the 880 Auto Wrapper is the ideal choice for fast-paced meat backrooms. Its tray centering technology aligns trays in a fraction of a second, producing the best quality wrapped package every time.

Hygienic Design

The 880 is designed with food safety in mind. Its detachable infeed tray can easily be removed for thorough cleaning. Waste incurred during the wrapping process is collected in the base of the machine – preventing cross-contamination – which can then be emptied through the release door.

Optimized Weighing and Labeling
Performance to Support Any Operation

The 750 Semi-Automatic Wrapper provides a cost effective weigh, wrap and label solution for medium-volume retailers. The 750 keeps inventory flowing smoothly from the backroom to the sales floor with its fast automated weighing and labeling capabilities.

▶ **www.mt.com/retail-750**

Increased Productivity

With a throughput speed of 14-22 packages per minute, the 750 is fast enough to keep up with sales activity. Operators benefit from automatic label application for repeatable, accurate label placement on all packages.

Cost Effective

The 750 Semi-Automatic Wrapper offers a cost effective alternative for grocery backrooms that do not require the high production speed of a fully automated wrapping system.

Easy Label Changes

With its easy access and intuitive design, changing label rolls is fast and easy, increasing production efficiency.

Quality Packaging

Retailers benefit from the optimal label placement produced by the 750's automatic label applicator. High quality labels allow for customized design applications and food safety labeling compliance.

Optimal Hygiene and Safety

With its open design, the 750 Semi-Automatic Wrapper reduces both the time and the effort required for daily cleanup.

Versatility and Control
Satisfying All Production Needs

The Step-Saver Hand Wrapping Station outfitted with a controller and label printer is the perfect solution for low-volume daily weigh, wrap and label needs. For larger retailers, the Step-Saver is an excellent backup system to handle peak shopping hours.

▶ **www.mt.com/retail-stepsaver**

Rugged Efficiency

The Step-Saver combines a compact profile and footprint with strength and durability. Stainless steel construction ensures durability and cleanliness.

Versatility

For the less common oversized items, the Step-Saver has the capacity to weigh items up to 60 lb.

Centralized Data Management

Step-Savers outfitted with the 840 Manual Label Printer benefit from the 800 Series Data Management Software. With its simple graphical user interface, this software synchronizes with other METTLER TOLEDO backroom equipment, such as the 880 Auto Wrapper, offering centralized, real-time access to all 800 Series devices within your enterprise.

Premier Labeling

An ideal partner for the Step-Saver is the elite 840 Manual Label Printer, a powerful tool that produces fast, eye-catching, high quality labels (based on either the product's overall weight or the product's item count).

Easy Film Changes

The Step-Saver holds two rolls of film simultaneously (up to 20 in. wide) in its housing.

Maximize Uptime
Boost Profitability

METTLER TOLEDO offers a broad range of service and software solutions that aim to maximize equipment uptime and longevity, and lower your overall cost of ownership.

Single Source Solutions
With METTLER TOLEDO Service, retailers benefit from efficient, comprehensive service from a single source.

Integrative Software
METTLER TOLEDO software solutions, such as the 800 Series Data Management Software for the backroom and MT RetailSuite Software, ensure centralized real-time access to your weighing devices.

Training and Support
METTLER TOLEDO offers a variety of training solutions to guarantee that you get the most from your equipment by ensuring that all operators are properly trained from the very start.
